

Recipe for Making Good Garden Soil

For a quick fix of a 100 square foot garden area (10'x10') 8 inches deep use:

5 bags **Bumper Crop Mulch**. It adds organic mulch, 'trace' nutrients, and mycorrhizae.

5 lbs **Ironite** to add iron to your soil.

4 lbs **Dr. Earth #7 All Purpose Fertilizer**.

5 lbs **Gypsum**. It adds sulphur and calcium to the soil and helps release nutrients already in the soil.

5lbs **Natural Guard Soil Activator**. It contains Humic Acid which organically activates the soil with Humates.

*Mix ingredients into the soil 8" deep,
plant properly,
water thoroughly.*

You will be pleased with the results.

Cost of Materials - 2010

Bumper Crop \$9.98 bag

(5 bag price) = \$44.40

Ironite 10lb bag \$10.98 (*only use 1/2 bag*)

Dr. Earth #7 Fertilizer \$8.98

Gypsum 5lb box \$4.98

Natural Guard Soil Activator 20lb bag \$12.98

(*only use 5lb use the rest in other gardens or on the lawn*)

Total Cost \$88.28 including Tax
